Corporate Environmental Policy

The Indium Corporation is committed to compliance with all applicable environmental regulations.

We will be a responsible member of the communities in which we work. As we strive for improvements in our business, we will remain mindful of the impact we have on the global environment.

We will continuously strive to reduce emissions to air, land, and water. Waste minimization through reduction, recycling, and reuse are an important pillar of the company management philosophy. We continue to explore technically feasible and economically practical methods to help us make a positive impact on the environment.

We maintain controls including periodic reviews to ensure that our policies and procedures are effective and being followed, making improvements where and when needed.

Brian J. Reid

Vice President, Operations

Michael F. McNamara

Director, Corporate Quality
