**Introduction**

TACFlux®057 is an air reflow, halogen-free, no-clean flux used with SnBi and SnBiAg alloys. TACFlux®057 provides excellent wetting in air and nitrogen and provides the low activation temperature necessary for the low melting SnBi and SnBiAg alloys.

**Properties**

**Reflow**

Peak reflow temperature should be <200°C in an air or nitrogen atmosphere.

**Storage**

TACFlux®057 syringes and cartridges should be stored tip down at 0-30°C. If refrigerated, TACFlux®057 should be thawed for 4 hours at room temperature before using.

**Technical Support**

Indium Corporation’s internationally experienced engineers provide in-depth technical assistance to our customers. Thoroughly knowledgeable in all facets of Material Science as it applies to the electronics and semiconductor sectors, technical support engineers provide expert advice in solder properties, alloy compatibility, and selection of solder preforms, wire, ribbon, and paste. Indium Corporation’s technical support engineers provide rapid response to all technical inquiries.

**Safety Data Sheets**

The SDS for this product can be found online at http://www.indium.com/sds

**Packaging**

TACFlux®057 is available in 10cc and 30cc syringes or 100g jars, however, other packaging can be provided to meet specific requirements.

**Cleaning**

TACFlux®057 is designed for no-clean applications. If necessary, the flux can be removed by using a commercially available flux cleaner.
