

PRODUCT DATA SHEET

Indium Monochloride

Indium(I) Chloride

Introduction

Indium monochloride is used as an indium precursor for deposition processes and in chemical synthesis.

Properties

Description	Indium(I) chloride
Particle Shape/Appearance	Chunks and solid pieces of varying size, dark purple to black in color
Chemical Formula	InCl
Molecular Weight	150.27g/mol
Uses	Chemical synthesis
Purity Grades Available	5N
Specific Gravity	4.18g/cc
Melting Point	225°C
Theoretical Indium Percentage	76.4
Minimum Indium Percentage	73.0
Nominal Indium Percentage	73.0–76.4

All information is for reference only.

Not to be used as incoming product specifications.

Packaging

- Vacuum-sealed in bags
- Available in 50, 100, 250, and 500gm
- Call for larger quantity packaging

Storage and Shelf Life

- **Indium monochloride** slowly reacts with moisture in air; the solid chunks will liquefy when exposed to humidity.
- The material is double-bagged, with the vacuum-sealed inner bag enclosed by a second bag with a desiccant.
- **Indium monochloride** has a shelf life of 6 months.

This product data sheet is provided for general information only. It is not intended, and shall not be construed, to warrant or guarantee the performance of the products described which are sold subject exclusively to written warranties and limitations thereon included in product packaging and invoices. All Indium Corporation's products and solutions are designed to be commercially available unless specifically stated otherwise.
