

RECLAIM AND RECYCLE

INDIUM • GALLIUM • GERMANIUM • TIN

Indium Corporation offers reclaim services for most indium-containing materials, including:

- ITO, IZO, IGZO
- Spent targets
- Used bonding materials
- Other unneeded or excess materials
- Worn out/replaced cryogenic seals

Indium Corporation is a longtime supplier of reclaim services and has the largest capacity worldwide. Our program offers:

- Analytic reporting
- High-yield return
- Competitive pricing

No hazardous or unrelated waste materials accepted.

Call us to see if your materials qualify for our reclaim program.

METALS AND COMPOUNDS

High-Purity Indium and Gallium: 4/9 to 7/9 Purity

High-Purity Tin: 5/9 Purity

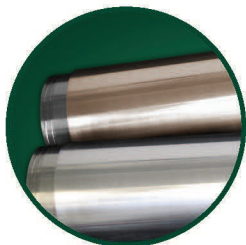

Evaporation Materials: Indium, Gallium, and Tin Shot

Oxide Products:

- Indium oxide, gallium oxide, tin oxide, and indium-tin oxide (ITO)
 - High degree of particle control
 - Tailored to specific particle size distribution and specific surface area needs
- Indium-tin oxide (ITO) in a variety of configurations, such as 90/10 weight% or mol%
- Can be tailored to specific customer needs

Targets (alloy):

- Sputter targets: copper-gallium and copper-indium-gallium (CIG)
- CIG rotary targets

Additional Products:

- Precursor products for MOCVD deposition materials (indium and gallium chloride)
- EZ-Pour[®] gallium trichloride: pourable and high-purity
- Indium trichloride: anhydrous, hydrated, and in solution
- Fusible alloys
